

HARTLEY DYKE FARM

Cranbrook, Kent.

New Farm Shop

On the 17th October 2014 Hartley Dyke Farm Shop opened its doors to the public for the first time to the delight of owners **Chris & Sheenagh Levett**.

Refrigeration Design

Cold Service Ltd were selected for their expertise in the supply design and installation of the refrigeration cases and associated plant. Providing advise when selecting appropriate cases.

Energy Efficiency

When selecting the refrigeration plant it was important to consider:

- Noise level
- Energy Efficiency
- Future Service & Maintenance

With this in mind low noise condensing units were selected. Including the use of digital scroll technology providing variable cooling capacity on demand to the butchery & delicatessen counters.

The shop contains multi section L-shape serve overs for the butchery and also the delicatessen which has a self serve corner section. These provide staff with a brilliant work surface as well as displaying produce for customers to view. The Bakery counter has one section ambient for cakes and pastries with the other chilled for deserts and cream cakes.

The three shop floor display cases maximise display area which helps to make best use of shop floor space. All of the cases and counters supplied were manufactured by Pastorkalt in grey at the customers request to fit in with the shop design and colour.

A central island in keeping with the shop design has been fabricated to house three large frozen display cabinets.
